How To Setup Your Guitar

String height or action describes the distance between the top of your frets to the bottom of your strings. This distance plays a key role in your setup because it determines the ease in which your guitar can be played. Action determines how much pressure and distance is required for the string to make full contact with

The compressor may not have the most transformative effect on your tone, especially compared to the dramatic difference chorus pedals or phaser pedals have on your sound. Very basically, a compressor reduces the dynamic range of your guitar - making the loud parts quieter and the quiet parts louder.
