In reference to Manchikanti et al's criticism of ACOEM ...

Manchikanti et al. (3), in a randomized clinical evaluation, systematically determined the prevalence of opioid abuse in interventional pain medicine practice settings, reporting an incidence of abuse of 24%. Manchikanti et al. (4) evaluated 500 patients and noted a 17.8% prevalence of controlled substance abuse by patients with chronic pain.

Monitoring of Patients Receiving Long-Term Opioid Therapy ...

Compared to trials by Manchikanti et al. (52, 55) which were one-day procedures, Heavner et al. published the trial in 1999 and utilized a 3-day protocol. The study has been criticized for its lack of a control group with all patients undergoing adhesiolysis even though one group received isotonic saline instead of hypertonic saline or ...

Introduction. Chronic musculoskeletal pain is associated with significant social and economic costs (Blyth et al., 2019, Shupler et al., 2019). What's more is that conventional treatment options such as opioid-based analgesics, corticosteroid injections, and surgical interventions are associated with small improvements versus placebo for pain and function and an increased risk of harm (Busse et al. ...)
