A mind map is a diagram used to visually organize information. A mind map is hierarchical and shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

Mind map - Wikipedia

Mind mapping with a sheet of paper and a pen is an incredibly intuitive and natural way to work. Yes, it has some downsides, but for a mind mapping app to really be better, it has to bring quite a lot to the table. While every one of the mind mapping tools on this list has its own unique benefits, they all meet at least the following criteria:

Collection Functions (Arrays or Objects) `each_.each(list, iteratee, [context])` Alias: `forEach` Iterates over a list of elements, yielding each in turn to an `iteratee` function. The `iteratee` is bound to the `context` object, if one is passed. Each invocation of `iteratee` is called with three arguments: (`element`, `index`, `list`). If `list` is a JavaScript object, `iteratee`'s arguments will be (`value`, `key` ...
