...

In object-oriented programming, factory pattern is the most commonly used instantiation object pattern. Factory class is a class specially used to create other objects. Factory class is very important in the practice of polymorphic programming. It allows dynamic replacement of classes and modification of configuration, which makes the application more flexible.

Explanation of factory pattern of PHP design pattern ...

Visibility. The visibility of a property, a method or (as of PHP 7.1.0) a constant can be defined by prefixing the declaration with the keywords public, protected or private. Class members declared public can be accessed everywhere.

PHP: Visibility - Manual
