Sap Report Writer Manual

The Report Writer is a tool using which you can define reports. Many reporting requirements can be met using the standard reports provided by various SAP application components. However, if your reporting requirements are not fulfilled by SAP's standard reports, you can also define complex reports using the Report Writer.

Report Writer - SAP Help Portal

The Report Writer can use sets from all set classes. However, a set name is only unique within one set class. If you entered a set name that exists in two different set classes, the system displays a dialog box in which you select the set that you want to use as the row block. You can also enter set variables as report selection criteria.

SAP Help Portal

To do this, follow the procedure for creating a new Report Writer report using the Report Painter report as a reference. The Report Painter report is copied and becomes available as a Report Writer report. The system automatically generates the necessary sets, so that you do not have to enter the prefixes for the set names.
