The Diagnostic Interview

A diagnostic interview, and there are many types, is a question and answer session between doctors, psychiatrists, psychologists or other trained professionals and people suspected of meeting criteria for certain diseases. When the person is a child, the interview may occur between questioners and parents or guardians.

What is a Diagnostic Interview? (with pictures)

The diagnostic interview (DI) is a central component of the process (diagnostic process) in which, for a variety of reasons ranging from research to the development of an intervention plan, a decision is made as to whether there is sufficient evidence in an individual's symptoms and signs for a diagnosis of one or more of the "disorder(s)" defined by the criteria of the internationally ...
