I know what a data scientist does and their purpose, I have two reporting into me. For me the term data scientist fits perfectly because not only do they provide information for decisions based on objectives, they build a stream of analysis starting from a hypothesis, use statistical models and end with an outcome.

The other day there was a wasp going in and out of my room on the second floor by the window. I closed the window because it was annoying me. The wasp found an entry through another window, in another room open in the second floor.

Is my cat Turing-complete? | Hacker News

Such a hypothesis can also help to explain novel cultural trends: the recent increase in obesity is explained as the result of a novel environmental change—the increased availability of cheap, high-fat foods—acting in concert with a once-adaptive, now dangerous, gustatory preference.
